RE: **Continuing Education – May 2009**

---

During the month of May we will continue to review the recent protocol revisions that have taken place over the last several months. **TAB 500 (Medical Procedures/Equipment)** has been completed and I will briefly review its content. In addition to protocol review and skill scenario stations, I will also provide instruction on:

- Mucosal Atomization Device (MAD)
- Treatment for AICD misfires

There will be a 15-question test related to the information presented during the month of April (**TAB 900**). Please take time to review the contents from Tab 900 to better prepare yourself. Test results will be provided along with discussion at each of the classes during the month.

I look forward to seeing all of you in the coming month. If you have any questions or comments please feel free to contact me thru e-mail or by phone.
